ANTISTATIC CLEANER FOR CAR GLASSES

Product description

Specific cleaner for car glasses, it cleans deeply without leaving spots and halos. It removes also stubborn grime such as exhaust gas deposits, pollutants, organic sediments, dust and dropping, leaving a thin antistatic film, which prevent dust deposition.

HOW TO USE: please spray the product on car glasses at a short distance (20 cm) and remove dirt with a microfiber cloth or paper. Rinsing is not necessary. Dilute the product with water (up to 50%), in order to slow down evaporation during the warmer months.
