

UV SHIELD

PREMIUM SEASONAL WAX

Product description

Super protective and ultra-performing wax for gelcoat and composite materials, with amazing water beading properties and highly resistant. It leaves a thin but tough film that anchors to the surface, keeping it shiny and protected from UV rays, weathering, pollution, tree sap, droppings, etc. UV SHIELD has been specifically formulated by our lab to assure a real protective shield that lasts a season. Thanks to its balanced blend of UV ray inhibitors, Carnauba waxes and polymers, it feeds and restores the original deep shine of surfaces, leaving a protective water repellent barrier and a rich gloss that lasts for long time.

HOW TO USE: please verify that the area of application is clean, with no oxidations and superficial marks. Pour some drops of product on a soft small pad and spread it with circular and vigorous movements. Please, pay attention to spread it homogeneously, insisting more times on the area. Let it act and dry for 10-15 minutes or more, thus allowing the product to reticulate. Then remove it with a soft and clean cloth.

Physical properties

Colour: Light ochre

Physical form: Liquid-creamy

Odour: Light and pleasant

Explosion limit: None

Flammability: Not flammable

IMPERFECTION LEVEL (HIGH 4 > LOW 1)

PROTECTION LEVEL (LOW 1 > HIGH 4)
